Iteration 2 Stories and Dev Tasks

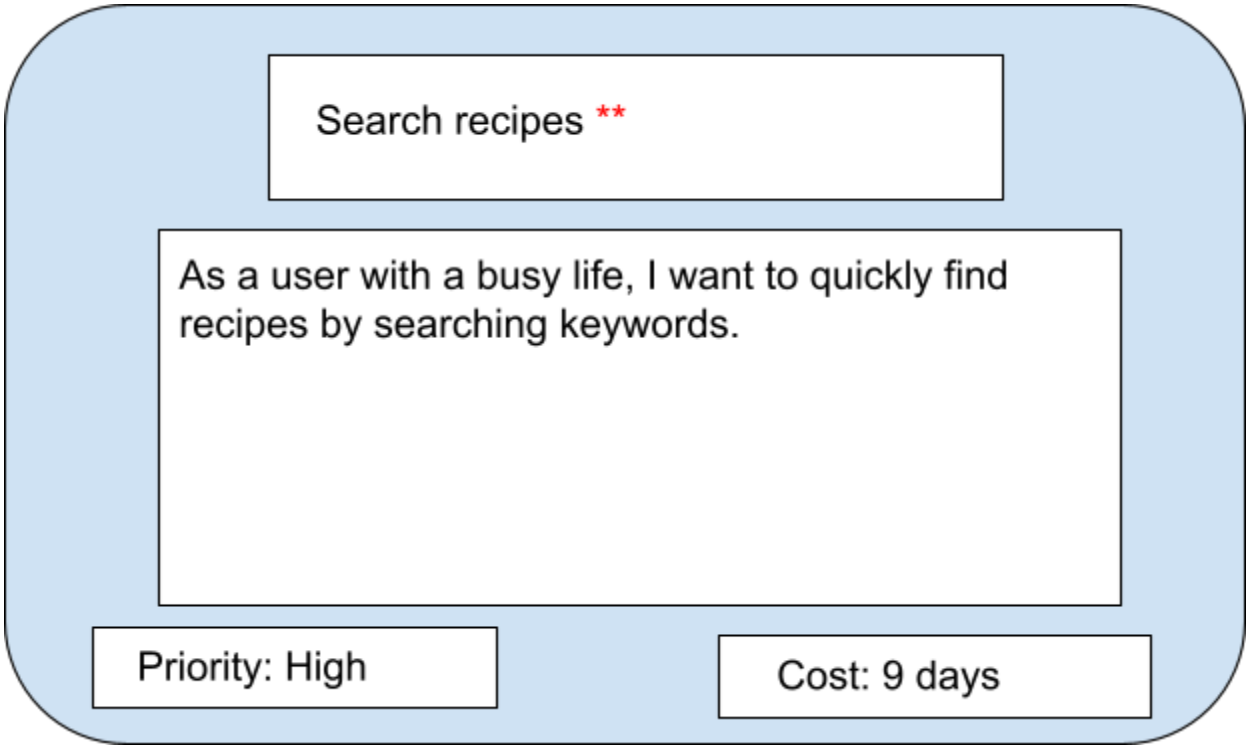
COMP 3350 Team 5 – Anthony, Daniel, Emerson, Izan, Sam

Legend:

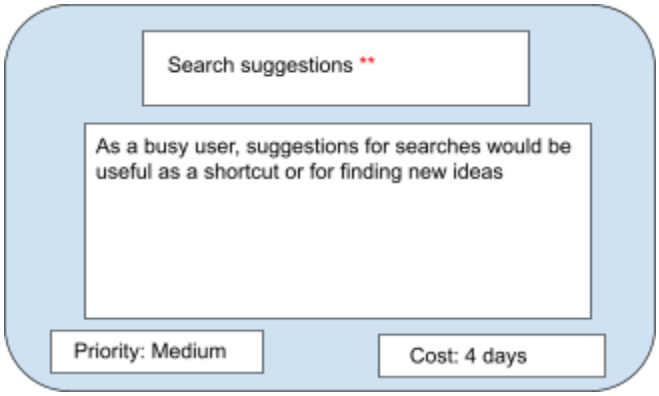
** = card is new or has been modified

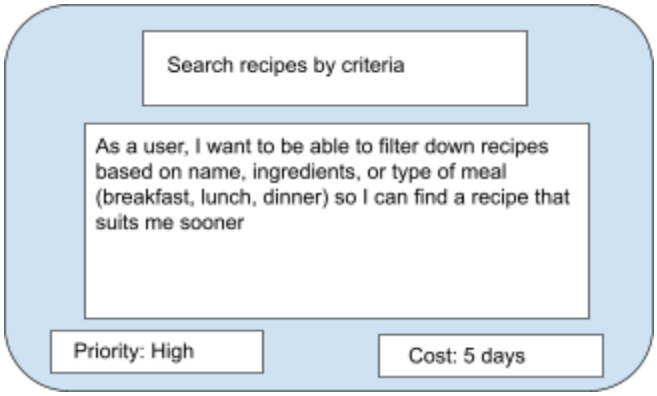
Search Recipes:

This is modified from the previous “Filter recipes based on diet” story, which has been blown up into several big stories.



Detailed:





Developer Tasks:

[High - 9 days] Filter Recipes

[NOT DONE] [Medium - 4 days] Add search suggestions in search textbox dropdown

[2 hours] add search box dropdown

[2 hours] add suggested searches/recipes in the dropdown

[DONE] [High - 5 days] Search recipes by criteria

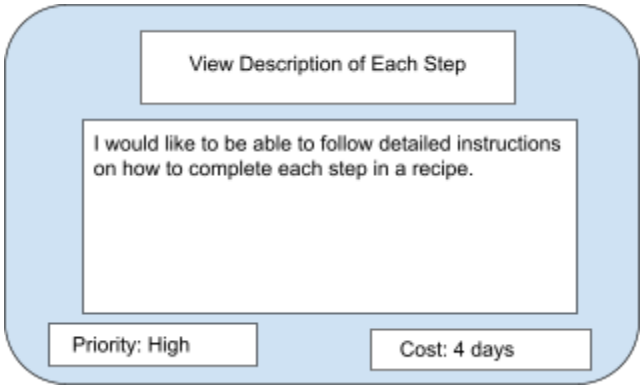
[2 hours] implement a search function to filter recipes based on search criteria

[3 hours] add a search box to the Recipes view (search button, expands to box)

View Recipe Steps:

We modified detailed stories to make them feasible.

Detailed:



Developer Tasks:

[High - 8 days] View Recipe Steps

[NOT DONE] [High - 3 days] See Preview image of recipe in the recipe view

[1 hour] Get appropriate preview images for recipes tied into the DB for display

[3 hours] Update recipe viewRecycler fragment in order for it to grab the correct preview image per recipe

[High - 5 days] View Ingredient Requirements

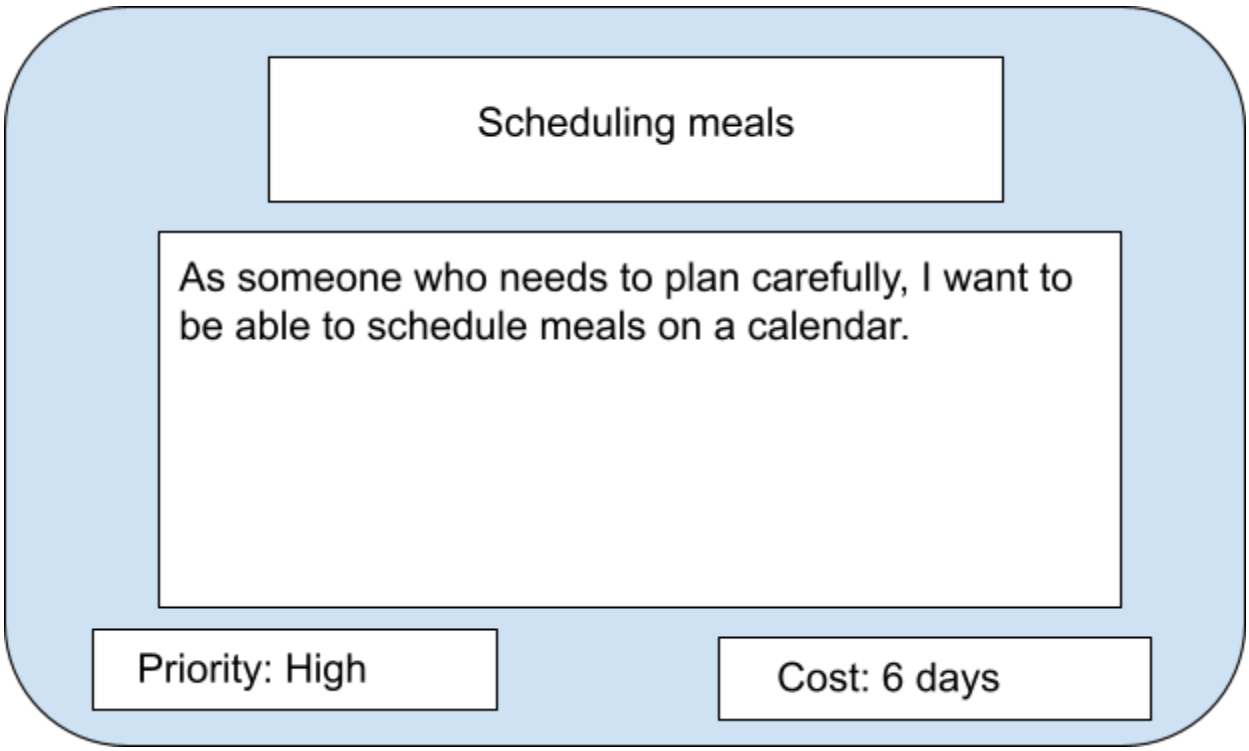
[DONE] [6 hours] Add an ingredient viewRecycler list fragment inside each recipe fragment that displays the ingredients for the recipe

[4 hours] Create delete, edit, add functionality for each ingredient in the recyclerView

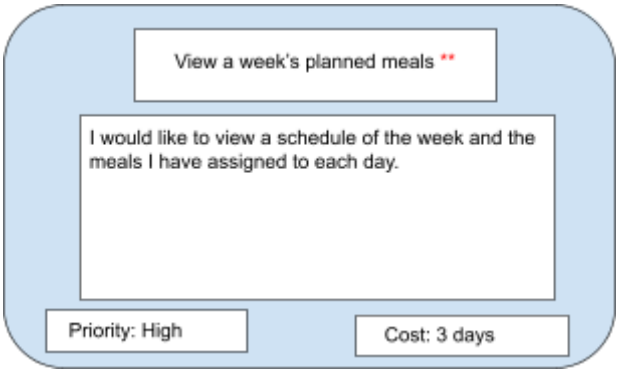
[NOT DONE] [3 hours] Add a servings multiplier calculation for each recipe and recipe ingredient for scalability

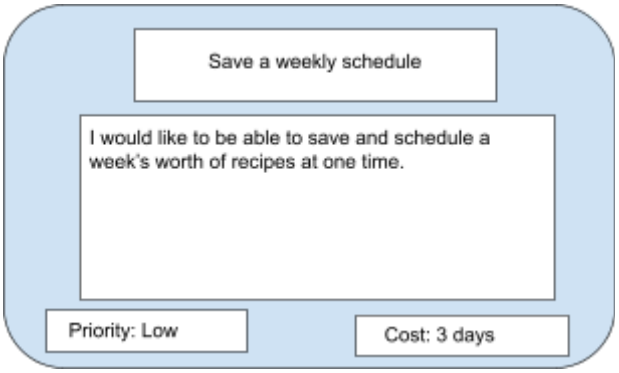
Scheduling Meals:

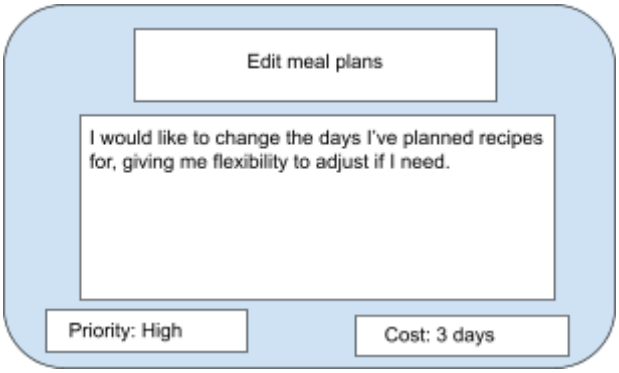
Added a detailed user story – viewing a week's meal plan



Detailed:







Developer Tasks:

[High - 9 days] Scheduling Recipes

[NOT DONE] [Low - 3 days] Save a weekly schedule

[3 hours] Add save button that allows users to save a weekly meal schedule in persistent storage

[DONE] [High - 3 days] Edit meal plans

[4 hours] Add button in recipe list page that opens a dialog that allows the user to select which day in the week to add the recipe to the schedule

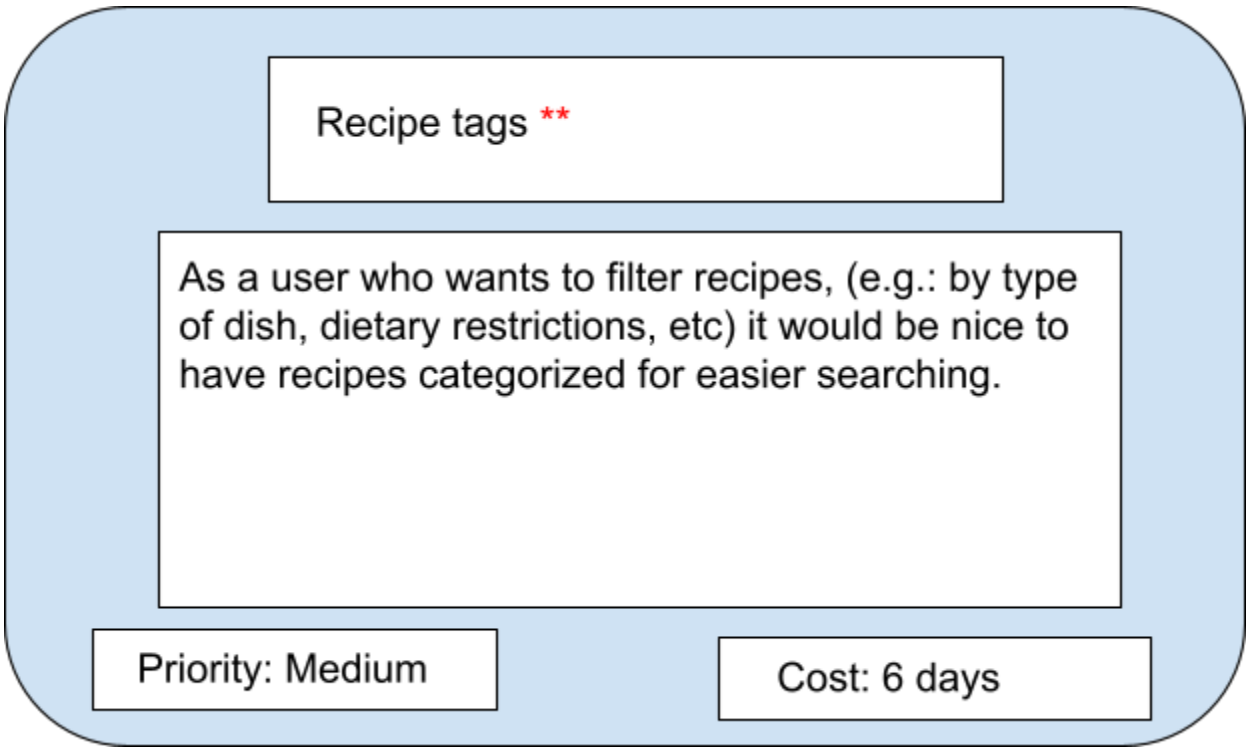
[2 hours] Add button in weekly meal plan to remove recipes from the plan

[DONE] [High - 3 days] View a daily meal plan in the schedule fragment

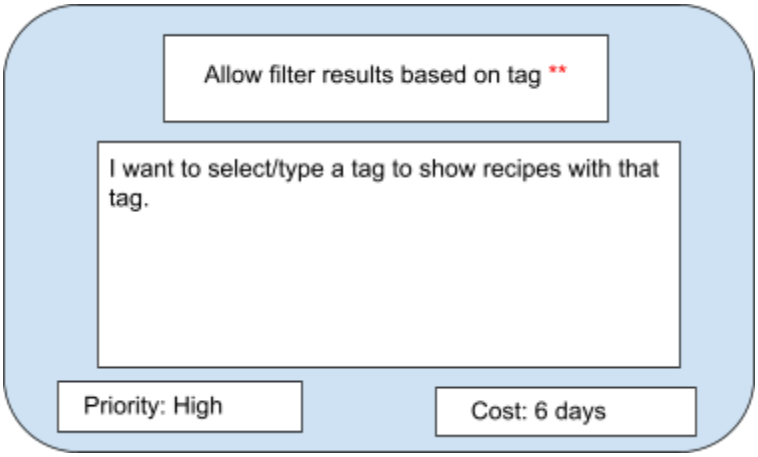
[4 hours] Add daily view of recipes scheduled for each meal time

Recipe tags [NOT COMPLETED]:

New big story



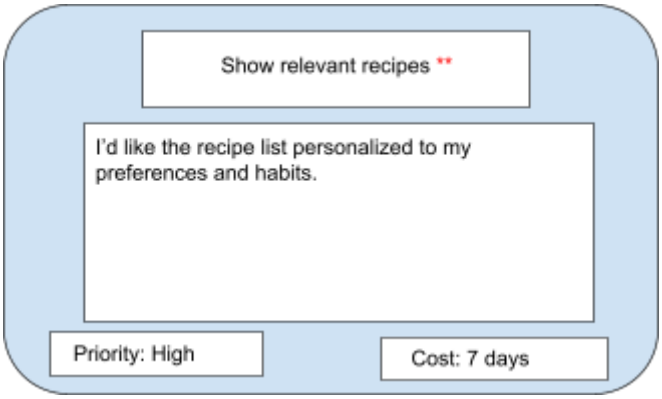
Detailed:



Recipe Recommendations [NOT COMPLETED]:

Another new big story, split from Search Recipes

Detailed:



Other Developer Tasks

[NOT DONE] [3 hours] Back button functionality
[NOT DONE] [2 hours] Settings page placeholder (for later: recover hidden recipes option)

Database

We need to create our database and fill it with real data.

- [DONE] [4 hours] Create the real database with HSQLDB
- [DONE] [1 hour] Create the DB interface
- [DONE] [2 hours] Create test for the DB interface
