Iteration 3 Stories and Dev Tasks
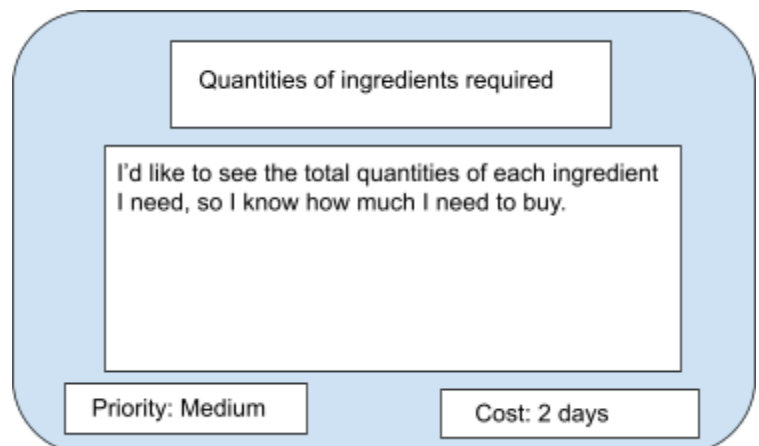

COMP 3350 Team 5 – Anthony, Daniel, Emerson, Izan, Sam

Shopping List

Shopping List **

I want the ingredients from the recipes scheduled in my Meal Plan to be automatically added to a shopping list.

Priority: Medium

Cost: 4 days
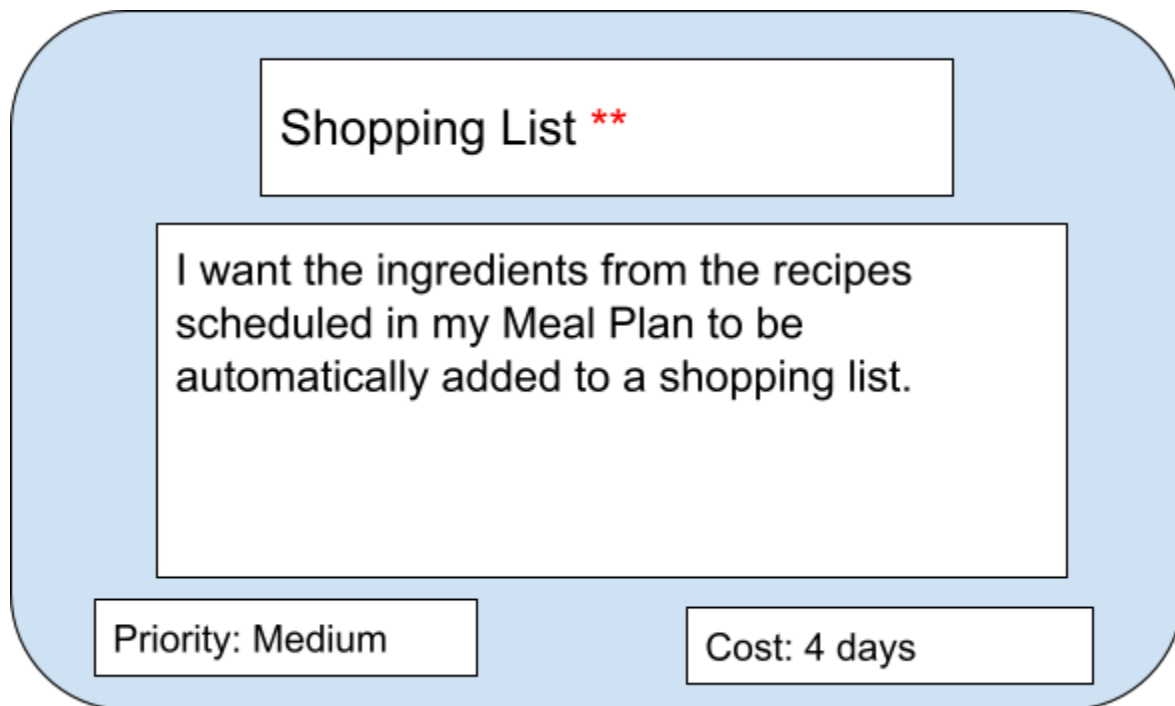

** This story is modified from our original vision and user stories (IT-0). We removed the criteria to edit the shopping list due to implementation constraints.
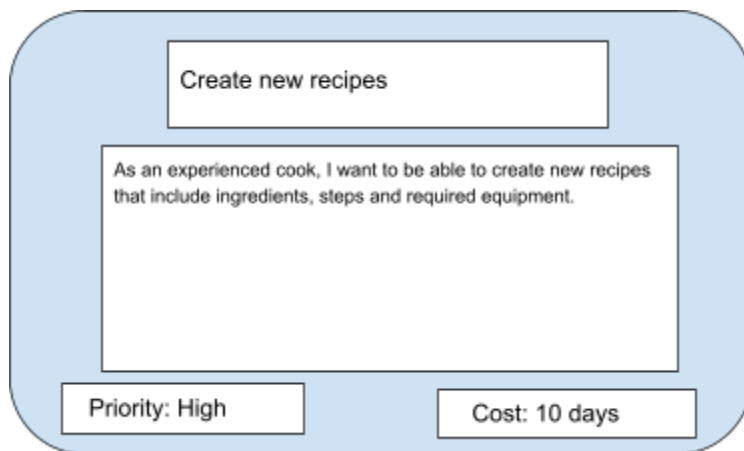

Detailed User Stories for Shopping List

Ingredients from Scheduled Recipes

I'd like to view which ingredients are found in all of the recipes added to my schedule, so all ingredients I need to buy can be easily found in one place.

Priority: High

Cost: 2 days

Quantities of ingredients required

I'd like to see the total quantities of each ingredient I need, so I know how much I need to buy.

Priority: Medium

Cost: 2 days

- **[DONE] [4 hours] Add in UI elements for shopping list view**
- **[DONE] [6 hours] Implement the queries and backend logic for interacting and querying for ingredients in shopping list**

Create new Recipes

This is a detailed user story from the big story, *Recipe Creation/Editing/Deletion* that did not get released in the previous iteration. We would like to add this missing functionality for this iteration.

Create new recipes

As an experienced cook, I want to be able to create new recipes that include ingredients, steps and required equipment.

Priority: High

Cost: 10 days

Developer tasks for Create New Recipes

- **[NOT DONE] [3 hours] Add logic to add new recipes**
- **[NOT DONE] [5 hours] Add UI to add new recipes**

Other Developer Tasks for Iteration 3

- **[DONE] [6 hours] Write better tests that were lacking from previous iteration**
- **[DONE] [1 hour] Retrospective writeup on improving test practices**
- **[DONE] [6 hours] Fix recipe filtering**
- **[DONE] [10 hours] Acceptance tests with Espresso**
- **[DONE] [8 hours] Integration tests**
- **[DONE] [4 hours] testing the database (real and stub): add to existing test cases, test new functions.**
- **[DONE] [8 hours] Fix recipe ingredient editing and deletion**
- **[DONE] [1 hour] Adjust architecture diagram**
